

WHAT IS SKIN NEEDLING?

The Skin Pen micro-needling device is the only medical grade needling device that is TGA (Therapeutic goods administration of Australia) approved in Australia. The needling device heads are all single use with a lockout feature, making them safe and hygienic. Skin needling is used with a device that is a non-invasive procedure. It works by creating thousands of micro-injuries in the skin to trigger

the body's natural wound healing process. This assists the promotion of collagen and elastin.

Skin Pen is a skin-needling system also known as CIT (collagen induction therapy) that helps to reduce the signs of ageing, improve the appearance of acne scars, large pores, uneven skin texture, pigmentation, fine lines, and wrinkles. It can also be performed on all skin types from fair to dark skins and all body areas including face, neck, décolletage, hands and stretch marks on the body.

WHO IS SUITABLE FOR?

Skin Needling is a skin rejuvenation treatment suitable for all skin types 1 – 6. Used to treat - Aging skin, Vertical lip lines, smoker's lines, Hyperpigmentation and sun damage, Skin tightening, Rejuvenation of hands, neck, and décolletage, enlarged pores, Stretch marks and scars, wrinkles, and Rosacea.

HOW MANY TREATMENTS DO YOU NEED?

1 session every 4-6 weeks until you achieve your goal.

Rejuvenation: 4-6 sessions

Scaring: 6-8 sessions

Stretch Marks: 4-8 sessions.

IS IT PAINFUL?

Skin Needling treatments can cause some discomfort but isn't painful. Topical anaesthetic cream will be applied for 15-30 minutes before the procedure. This will help make the treatment virtually pain-free.

HOW MUCH DOES IT COST?

Usual price for 1 session is \$300 and we also offer package deals.

Please check out our sales and packages.

WHAT IS MY DOWN TIME?

After your Skin Needling treatment, your skin may appear flushed, with slight redness and possible mild swelling. You may also experience light flaking. But don't panic: Most of the redness and

swelling should subside within 24 hours. The entire healing process takes 2 to 5 days. Typically, you will see results after the first treatment. Lasting and more results will become visible after 4 to 6 treatments. The condition of your skin will improve over the next 6 to 12 months after a course of treatments.

CONTRAINDICATIONS

Current infections, Pregnancy, or lactation due to the local anaesthetic, Heart conditions, Blood thinner and Keloid scarring.
